Subject: Royal Marine Drive

I am writing to register my objections to the disposal of the property on Royal Marine Drive. Or more to the point i am writing to make my objections to the way this has been done. There should have been an open and transparent sale procedure not just what one or two council people want to happen. Anything that is proposed should include provision of toilet facilities for the general public. This council is very good at disposing of property belonging to the council tax payer for the profit of the few. It appears to be a ridiculous council requirement that they want holiday lets included with the likelihood of the flooding problems getting worse and the road having to be closed more often.

Could i suggest that you and the other senior officials at the council read the scarborough news facebook page and actually read the suggestions that people have for the future of this property. Not all suggestions are unrealistic. Think of the public for a change and not the profit of the few.
